

Post Doc - Michigan State

Postdoctoral Position in Polymer Synthesis/Polymer Surfaces.

A postdoctoral position is available in the in the Department of Chemistry at Michigan State University, starting December 1, 2009. This position is associated with a joint research program of the Bruening and Baker groups, the application of surface-initiated polymerization for the purifications of proteins and other biological molecules. We seek candidates with excellent synthetic skills – experience in surface chemistry would be helpful, but not required. Interested candidates should send pdf versions of their curriculum vitae, list of publications, and the names and contact information for three references to Greg Baker (bakerg@chemistry.msu.edu) or Merlin Bruening (bruening@chemistry.msu.edu).
