NASA Postdoc

The Materials and Structures Division at NASA Glenn Research Center seeks applications from well qualified candidates for a fellowship in the NASA Postdoctoral Program http://nasa.orau.org/postdoc/ to work in the area of polymer based aerogels. The project work requires candidates with excellent laboratory skills and proficiency in synthetic organic & polymer chemistry. Applicants should be able to work well as part of a team, to communicate regular progress updates, and to guide others in the lab where appropriate. This position is only open to US citizens and non-US citizens who are Lawful Permanent Residents. Interested applicants should refer to the Research Opportunities listed at https://www3.orau.gov/NPDoc/Catalog/18694 in Polymer Aerogels. For more information, please email maryann.meador@nasa.gov. Candidates must submit an application and proposal by November 1, 2014.
