

Postdoctoral Fellowship

Candidates are sought for Competitive Postdoctoral Fellowship Opportunities in the Sustainable Polymers Group at the National Institute of Standards and Technology in Gaithersburg, MD. The research area is focused on sustainable composites interface characterization. Applicants with experience in fluorescent dye labeling of polyesters, polysaccharides, or proteins, with chemical characterization of bio-based materials, using confocal fluorescence microscopy or Raman spectroscopy, or with mechanical characterization of bio-based composites are encouraged to apply.

The fellowships are **only open to U.S. citizens.**

Candidates interested in these opportunities should contact: Jeffrey W. Gilman (jwgilman@nist.gov)
