Our positions are commonly referred to as Resident Engineers, Resident Project Representative, Construction Observers. We are in the field overseeing the construction as intended by the design engineers (see our website for types of projects). New employees need knowledge of construction, testing and commissioning, along with excellent documenting and people skills. **We are looking to fill 2-4 positions in the New England offices as well as 1-2 positions for our Florida office for the first qtr of 2022.** We will coordinate a successful candidate to receive certificate training and on the job training prior to being assigned a specific project. We make our 2022 project alignments in December 2021. Please advise your graduating seniors (Dec or May) as well as graduate students to reach out if interested.

**Job Description**

At Engineered Concepts we are committed to quality and safety which begins with the expertise of the people we employ. If you’re interested in continuing your career or beginning a new exciting path, we’re looking for dedicated applicants to join our team.

The successful candidate will work on challenging and diverse tasks in a consulting and construction management role that will require application of technical skills, project delivery, and leadership for construction projects.

Candidates should have basic experience in road utility, water and sewer. Experience with pump stations and treatment plants a plus.

**Responsibilities include but are not limited to:**

- Must be able to work with contractor personnel and various stakeholders to assure work conforms to project plans, specs and approved submittals.
- Attend various meetings as needed related to assigned construction projects.
- Responsible for job specific quality system tasks as defined in the project manual.
- Assist with the preparation of written reports and documentation. Construction reports, pictures and logs are written and filed daily.
- Perform materials inspection and acceptance prior to installation.
- Assist with the coordination of required project acceptance testing.
- Point out potential problems to the contractor to keep chief inspector and/or resident engineer informed of project progress.
- Perform specific installation tasks and field measurements.
Must have strong written and verbal communication skills.
Must comply with company mandated safety policies.
Must have a fundamental understanding of construction.
Must be able to read plans and have a good understanding of project specifications.
Perform other duties as may be required.

Minimum Requirements:
Safety Certifications a plus but not required:
  - OSHA-10 Training
  - Confined Space Entry Certification
  - NICET – Level 1
Must have a valid driver’s license, able to work in the U.S. and pass a drug test.

Job Type: Full-time
Pay: $25.00 - $45.00 per hour  Gas card Toll pass and $125/day per diem for certain projects
