Application Scientists

Nanoscience Instruments is hiring multiple application scientists for our demonstration and analytical laboratories in Phoenix, AZ and Alexandria, VA. If you know of any recent or soon-to-be graduates with a background in materials or surface science, we are hiring PhD level scientists to support QCM-D, optical & force tensiometers, and nanoparticle generation instrumentation.

Requirements:

- Experience with QCM-D, AFM or other similar analytical surface science technique
- Chemistry, Physics, or Engineering PhD with a focus on surface science
- Willingness to travel domestically and internationally
- Because this position requires access to Government, Military, and other high security labs, US Citizenship is required

Bonus qualification:

- Experience in electrospinning

More information about Nanoscience Instruments and this job opening can be found here: https://www.nanoscience.com/about-us/jobs/surface-science-applications-scientist/

Interested candidates can send their resume directly to Matthew Dixon and reach out with any questions.
